A proposal to develop 'MSUIS – a Software System for admission and student life cycle management' has been received from Prof. Apurva Shah, Director, Computer Centre vide letter No. Comp/97/2020-21 dated 26-6-2020.

At present the student life cycle as well as admission data of all University students is managed by MKCL. According to Director, Computer Center, a good University must have its own system to manage the student's data and life cycle and computer center and Department of Computer Science and Engineering have enough technical expertise to develop and maintain this kind of large software.

In order to develop, run and maintain MSU owned Software System for various functionalities, Director of Computer Centre has also sent a financial proposal of Rs 304.60 Lakhs for five years towards Infrastructure cost, Manpower cost for software development and cloud services & Maintenance cost.

The detailed proposal received from Director, Computer Center to develop MSU owned 'MSUIS – a Software System for admission and student life cycle Management' is placed before the Honorable Syndicate member for consideration and suitable budgetary provision.

Sub: Proposal to develop MSUIS – a Software System for admission and student life cycle management

Dear Sir,

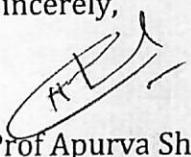

At present, student life cycle as well as admission data of all University students is managed by MKCL (Maharashtra Knowledge Corporation Ltd). A good University must be having its own system to manage all these data which help in maintaining confidentiality of data.

Now, Computer Centre and Department of Computer Science and Engineering is having enough technical expertise to develop and maintain this kind of large software, provided some programmers, Infrastructure and necessary budgets are provided.

Therefore, I am sending the proposal (Appendix A) herewith about development of the Software with necessary manpower and infrastructure required and budgeting information which may help us in taking better decision.

Please note that, our own system might be useful for developing many other applications also which may help to identify us as a true Digital University.

Sincerely,

Prof Apurva Shah

Director, Computer Centre

APPENDIX A

Proposal for MSUIS (MSU Information System)

1. Preamble

In the era of digital world, the University must be having its own software system to manage new admission of the students as well as whole student life cycle. Students life cycle takes care of the data of students' entry in the University till the student is conferred the degree in which students hardly need to visit the University Office. We can provide a smooth and rejuvenating experience to the students with hassle free environment. **We can have control on our data and privacy can be achieved only if the system is indigenously developed.**

2. Proposal

I propose herewith to develop MSUIS (MSU Information System) – An MSU owned Software System for various functionalities to make the University truly digital. MSUIS will be a Web based system that will manage the academic and other operations of our University. At present, we have different modules of MSU Exam Portal, Audit Management System, Hostel Management System, Annual Report Management System, Online Recruitment portal (Permanent Teaching / Admin, Temporary Non-Teaching Admin staff), e-Tablet Management portal, NAAC – DVV Portal, Online Staff Management System, NIRF data Collection Mechanism that have been developed by the Team of Computer Centre along with the Department of Computer Science & Engineering. On other hand, Digital University portal is rented from MKCL. With one indigenous system, we will be able to club all modules as well as enhance the functionality by adding some more modules. **We will be also able to achieve better privacy of the data with the help of MSUIS.**

3. Modules of MSUIS

Various functionality of the software may be defined in different modules of the software. This will be our own indigenous system with following modules. **First Four modules are most important and they must be developed within one year.** Other modules may be developed or clubbed with MSUIS during expansion phase of the software; depending on the priority decided by competent authority of the University.

1	Admission Management (May 21)	This module will take care of students' admission for all students as per the requirements of various statuaries bodies authorized to give Admission. ED

5.0 Pros and Cons of In-house Development

5.1 Pros

1. More Reliability and Accountability
2. Flexibility of tailoring as per requirements
3. Much shorter turnaround time
4. Full control over the system
5. Cost effective and financially more beneficial to university in many ways.
6. Going Digital, Going Green
7. Most important, confidentiality of our data!
8. More functionalities supported (Truly digitized)

5.2 Cons

1. Difficulty in finding good and experienced programmers in terms of cost
2. Difficulty in training our own employees and their Resistance
3. Less QC as it would not be possible to have exhaustive testing

6.0 Specific Requirements for the Project

- The term of temporary posts may be extended for next 11 months (Maximum Two Times) with the permission of Hon'ble Vice Chancellor
- It is very crucial especially during first two years that, all temporary positions are filled up as the project is time bound and it is required to achieve the hard deadline in next 10 months only.
- Necessary steps like waiting list should be maintained for selected candidates. Also, if no alternative is there, the position may be filled up with daily wages and technical person at special rates of 1000 Rs/day for 8 hours/day.
- Overtime rates should be applicable proportionate to the existing salary structure of the temporary employee.
- 8 hours of Effective workload has to be considered as regular working hours and after that over time shall be permissible.
- Special security provisions will be required as taking account of longer work period and safety of the staff.
